

CyberApps	@CYBER
------------------	---------------

Issue commands to change the operating parameters of a Cyber Application.

Keyword:

@CYBER

Usage:

Issue a command to the Cyber application or to the CyberServer. The command code will determine the action taken.

Data Fields:

command	A command key - see the table below.
name	The system or component name
value	The system or component value

Cyber Commands	Arguments
CA_APPLICATION	<application_name><application_file>
CA_COMPONENT	<component_name><component_file>
CA_PARAMETER	<parameter_name><parameter_value>
CA_LOAD	<cyberapps_name>
CA_RUN	
CA_PAUSE	
CA_STOP	
CA_BEGIN_CONFIG	
CA_END_CONFIG	

Example Specification:

```
@CYBER
#command      name      value
CA PAUSE
CA_COMPONENT   'route'   'Indy38thSt'
CA_PARAMETER   'VehMass'  75000[lbs]
CA_RUN
```

The above commands configure CyberTruck to use the 38th Street route and set the truck mass to 75000 pounds.
